# **ABSTRACT**

## **KEY FACTORS AFFECTING GIRLS & WOMENS IN THE PRESENT SOCIETY**

United nations in its millennium summit in 2000 declared "Gender Equality & Women Empowerment" as one among the eight millennium development goal to be achieved by the year 2015. However these goals are far from being realized in a country like India. In fact women in India are deprived of their fundamental right to dignity also, leave alone the question of gender parity. The article attempts to grapple with few challenges faced by the women by India like dowry, female feticide, denial of inheritance right, sale and trafficking of girls, sexual harassment, domestic violence, etc. The objective of this seminar is to evolve strategies to empower women uniformly like men.

Retd. Professor (DR) Parbati Sahoo  
Dept of Home science
